

Talking about divisive issues

MYIAH J HUTCHENS, PH.D.

ASSOCIATE CHAIR & ASSOCIATE PROFESSOR

DEPARTMENT OF PUBLIC RELATIONS

UNIVERSITY OF FLORIDA

Who am I?

- ▶ Political communication scholar with a focus on exposure to counter-attitudinal information

Goals for Today

- ▶ What influences how we process information?
- ▶ What does counter attitudinal communication look like and how do we approach it?
- ▶ What are the consequences of how we engage?
- ▶ What should we do?

Our biases...

- ▶ Confirmation bias

Our biases...

► Cognitive dissonance

I am a
foodie

Biology is
hard to
override

Cheetos
are the
perfect
food

Cheetos
are
cheese

Our biases...

- ▶ Motivated Reasoning

Our biases...

- ▶ Social Identity, in-group

Polarization

Attitude/Issue Polarization

- ▶ Increasingly different views on political topics

Affective Polarization

- ▶ Gap between positive feelings towards “our side” versus “their side”

Party favorability 1964-2020

Communication's role

**Filter
Bubbles**

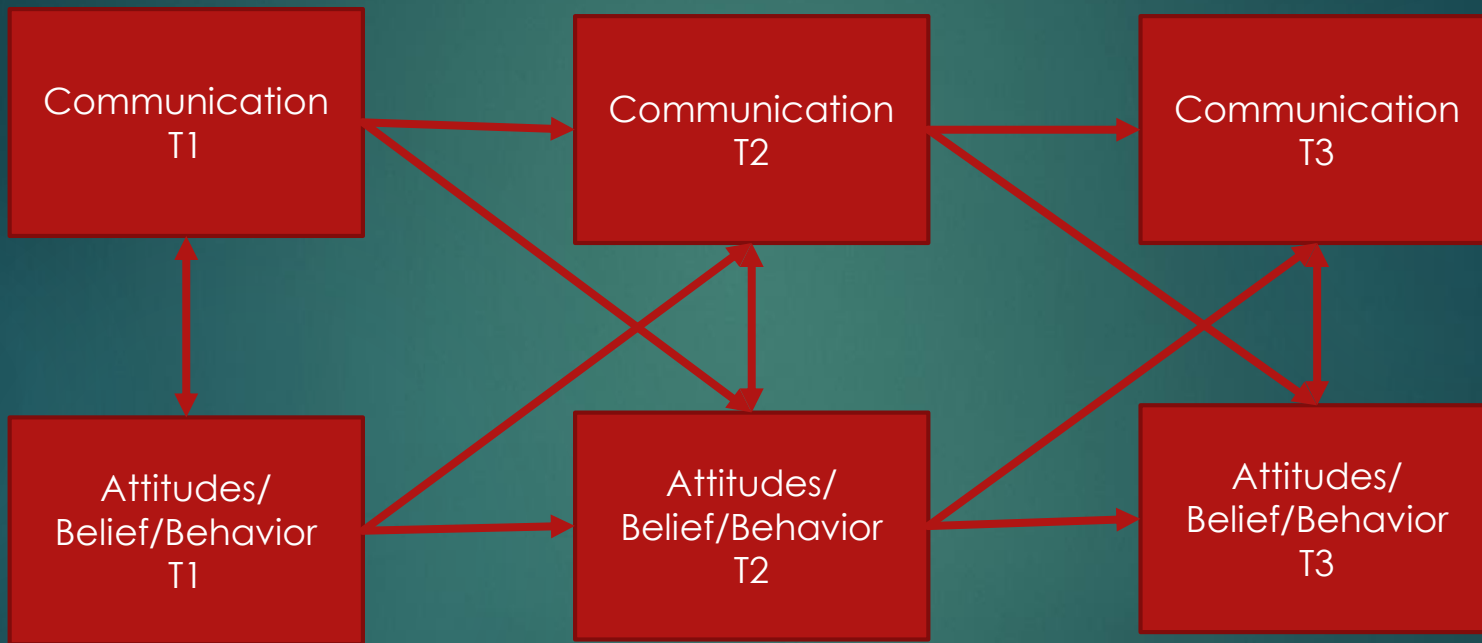

How Much Counter Attitudinal Information Do We See?

- ▶ Some!
- ▶ Preference for similar others
- ▶ Junkies vs. avoiders is more common with media
- ▶ Only about 10% of people say they never discuss politics with people they disagree with
- ▶ More common to get counter attitudinal views through mediated sources

Reinforcing Spirals

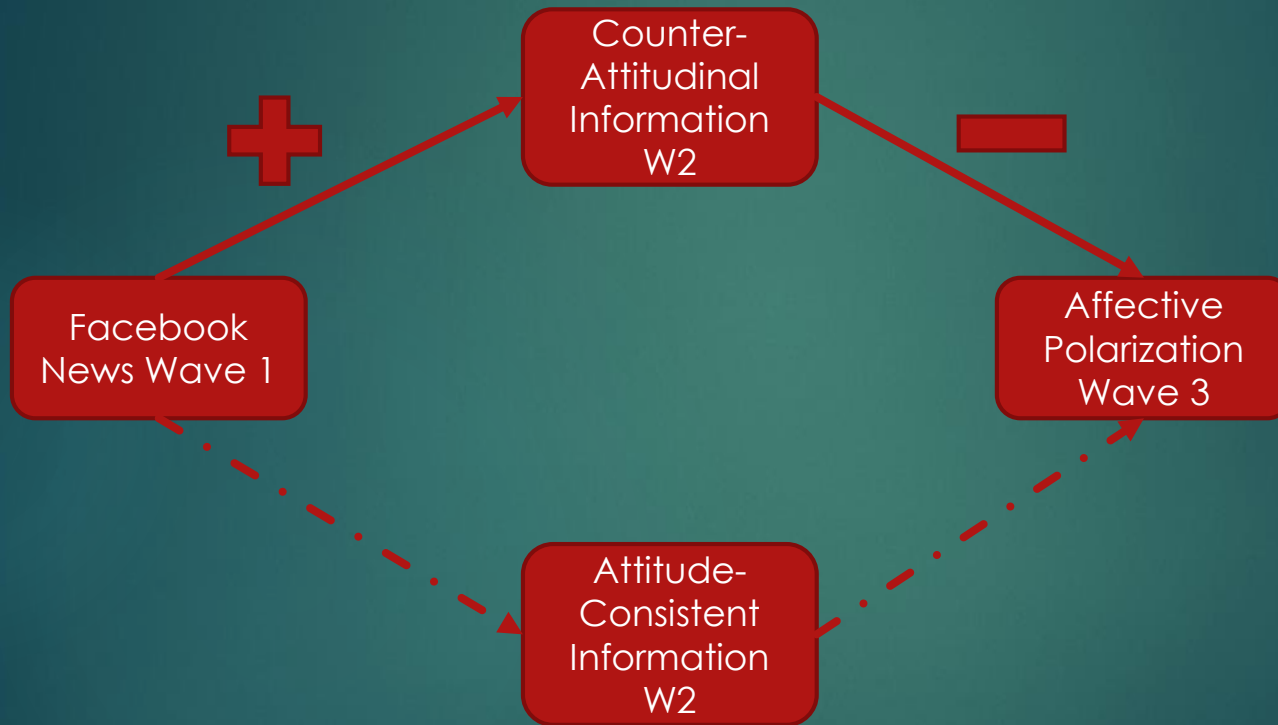

Overtime Relationships Interpersonally

Over-time Relationships On Social Media

Mediation Based on Information Type

Conclusions

- ▶ Facebook doesn't appear to be facilitating filter bubbles
- ▶ When looking at over-time results, using Facebook for news is related to *depolarization*
 - ▶ This is due to increased exposure to counter-attitudinal news sources
- ▶ Talking to people like ourselves does increase polarization, so what is the effect of online discussions?

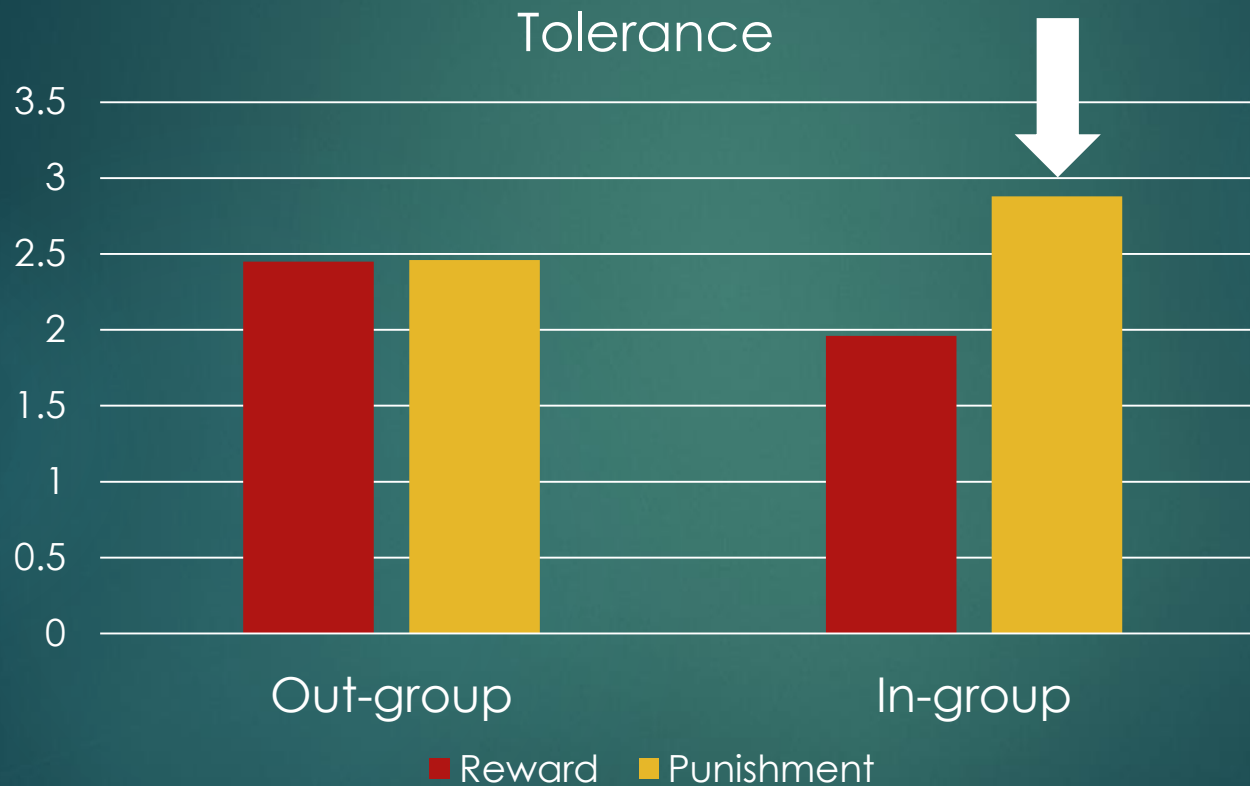

Group Identification

Power of Modeling

Results: Manipulation Effects on Tolerance

Conclusions

- ▶ What your in-group does matters
- ▶ Disagreement can have positive effects
- ▶ Exposure to incivility does not in and of itself lead to negative outcomes, but changes based on responses to that incivility
- ▶ Who is participating, and what we expect to see, matters for how we react to these situations

Key Recommendations

- ▶ Challenge yourself to seek out diverse perspectives
- ▶ Call out people on your “team” when they are behaving badly
- ▶ Try to reinforce shared identities when talking to someone you politically disagree with
 - ▶ LISTEN in these conversations
 - ▶ Remember you are talking to a person, not a media caricature

Thank you!
